Dear Amit Chhajer ,

RE: Application for software development internship at Trudoc

My name is Eunice Musenyia, an entry-level software developer with a profound interest in crafting intuitive and inclusive solutions that bring changes to individuals' lives. I am writing to express my interest in a software development internship role at Trudoc.

With a firm conviction, I strongly believe that crucial promotive, preventive, curative, and rehabilitative health services should be accessible and affordable to all. Trudoc's dedication to providing accessible, reliable, and quality healthcare to everyone is truly impressive. I particularly love how the company's platform enables individuals to access unlimited follow-up care, doctor consultation, telemonitoring, and teleconsultation services anytime, anywhere. As someone deeply passionate about enhancing healthcare delivery and improving patient outcomes, joining this team presents an excellent opportunity for me to grow my skill set and positively impact the healthcare sector while contributing to the company's mission to implement ethical and unbiased care, aligning people and payers under one platform.

I am currently collaborating with a team of four on a project to develop a system to improve immunization rates in Somalia by efficiently tracking children's vaccinations for NGOs.

I am looking forward to hearing from you. Thank you for your consideration.

Yours sincerely,
Eunice Musenyia
